

EDUCATION

McGill University

Montreal, QC

B.Sc in Biochemistry

Sept. 2015 – Dec. 2018

- BL21 Research Scholar: Research Grant for Independent Student Researchers
- Yale Hackathon Award: Developed a machine learning classifier to rate building accessibility for people with disabilities.
- T.E.A.M Scholar: Grant for Exceptional Students in Chemistry

RESEARCH EXPERIENCE

Carnegie Institute of Science

Palo Alto, CA

Research Assistant, Advisor: Professor Moisés Expósito-Alonso

April. 2021 - Present

- Disentangling genotype-phenotype differences (such as drought tolerance and root growth) in the Brassicace family using deep learning algorithms.

Stanford University

Palo Alto, CA

Research Assistant, Advisor: Professor Jesse Engreitz

April. 2019 - Present

- Curated CRISPR-FlowFISH, GWAS and eQTL datasets to benchmark the performance of existing cCRE-gene linking prediction methods.
- Organized multiple bioinformatics challenge days to foster community collaboration and analysis in the field of Distal Regulation.

Stanford University

Palo Alto, CA

Research Assistant, Advisor: Professor Anshul Kundaje

April. 2019 - Present

- Developed and optimized a data mining and analysis pipeline for processing DNase, ATAC and Histone data on ENCODE to generate an atlas of cCRE-gene linking maps across 200 celltypes and tissues
- Developed deep learning algorithms to investigate the transcription factor landscape and mechanistic behavior of chromatin modifiers

University of California, Berkeley

Berkeley, CA

Research Assistant, Advisor: Professor Montgomery Slatkin

April. 2019 - April 2020

- Developed an analytical solution to estimating coalescence probabilities and population divergence times from SNP data in Neanderthals.

McGill University

Montreal, QC

Undergraduate Researcher, Advisor: Professor Jerome Waldispühl

May. 2018 - Jan. 2019

- Improved and developed upon a citizen-science interface to solve the multiple sequence alignment problem across biological kingdoms - [Phylo; a citizen-science platform for solving the multiple sequence alignment problem](#)
- Utilized Phylo to curate a syllabus focused on introducing kids to biological topics.

McGill University

Montreal, QC

Undergraduate Researcher, Advisor: Professor Kalle Gehring

Sept. 2016 – June. 2018

- Developed and improved protein purification experimental protocols.
- Used size-exclusion chromatography and Nuclear Magnetic Resonance (NMR) to discover an unexpected secondary structure within a linker domain of a mitochondrial protein involved in autophagy (DENND3).

LEADERSHIP EXPERIENCE

Community Organizer

Palo Alto, CA

Sunrise Movement, Justice, Equity and Anti-Oppression Lead

Aug 2019 - Present

- Facilitated Discussions to address issues involving accessibility, inclusion and anti-oppression and created affinity groups for marginalized identities to process and connect on similar experiences.
- Spearheaded a Compensation Fellowship program focused on financially supporting under-served community leaders doing electoral work.
- Involved indigenous organizations in decision-making processes and to respect the principle of free, prior and informed consent when pushing for local policy.
- Launched an awareness campaign and spearheaded mask & air-purifier builds to aid communities affected by wildfires, in collaboration with the Common Humanity Collective
- Established partnerships with Palo Alto City Council to redefine and re-access Palo Alto's Sustainability Goals

SELECTED COURSEWORK

Molecular Biology & Cell Biology

Physical Chemistry & Biological Sciences I, II

Molecular Mechanisms of Cell Function

Laboratory Methods in Biochemistry & Molecular Biology I, II

Microbiology
